

Rombouts®

Rombouts

Professional
PRODUCTS OFFER

Passion and know-how passed down
from generation to generation...

Rombouts is a true family business.

It all started in Antwerp, Belgium, in 1896
when Frans Rombouts decided to rent
a roasting drum to roast coffee himself.
This marked the starting point of a remarkable
success story, whose pleasurable and tasty
episodes are now appreciated more than ever
by coffee lovers everywhere.

“Every coffee bean must be
treated like a diamond”
- Frans Rombouts

Careful selection of coffee beans

For Rombouts, quality is the priority. The sourcing and selection of the raw ingredient; green coffee, is the first essential step to ensure perfect quality. At each stage the coffee is checked and tasted, up to five times before reaching our customers. This guarantees a perfect result in the cup. Rombouts uses mostly high grown Arabica beans, which are slow roasted using traditional methods, as we believe this helps develop the best flavours and aromas.

Rombouts Coffee UK

Rombouts came to the UK in 1965 when the family saw a demand for high-quality roast and ground coffee from our nation of tea drinkers! Today Rombouts in the UK is run by a team of passionate individuals who love coffee and live Rombouts!

Coffee & more for your business

We source, roast and supply premium quality coffees to businesses throughout the UK. Complementing our coffees with accessories, ancillary items, equipment and service & training packages, we want to help ensure you can serve the best cup of coffee to your customers each and every time.

Hotels, restaurants & caterers

Rombouts has served the UK HORECA market for over 50 years. We offer a true 'One Stop' solution for all your coffee and hot beverage needs. From espresso to bulk brew – bedroom to banqueting.

Cafés & coffee shops

Having supplied delicious coffee, expert training and impeccable service to cafés and coffee shops for over half a century, we know how important a great coffee offer is to your customers. We work in partnership with you, offering advice, training and service.

Offices, shops & hair salons

With great coffee to keep your staff, clients and customers happy we have solutions for all shapes and sizes of businesses; from our famous 'One Cup Filter Coffees' through to fully automatic 'Bean to Cup' and 'Pod to Cup' systems.

Respect for the quality,
the coffee & the people
who produce it.

Direct trade – a partnership in quality & respect

Both Xavier Rombouts and his father, Hugo, regularly visit coffee farms around the globe with whom we have direct relationships.

One coffee farm close to their hearts sits on the bottom of a crater formed from a giant, extinct volcano in the Bolaven Plateau of Southwestern Laos. Working in partnership with the Laotian coffee farmers, we can guarantee a minimum price, thus helping to improve both the quality and quantity

of coffee produced. This also helps to ensure the sustainability of the crop within this coffee-growing region.

The Arabicas from Laos are renowned for their elegant flavours and aromas that blend a mild acidity with notes of chocolate, nuts and peaches.

Laos is one of a growing number of countries where we have direct relationships with, others include Cuba, Ethiopia and Mexico.

Coffee knowledge & training

Rombouts know that a barista can make or break a cup of coffee and any inconsistencies greatly impact the overall quality of your proposition. We offer a range of coffee courses to help you make and serve a fantastic cup of coffee, time and time again.

Training & educational modules:

- Introductory barista training
- Advanced barista with grinder calibration
- Bespoke customer training
- Coffee audits

Coffee equipment, service & maintenance

We are first and foremost a coffee roaster, and as such, we are not tied to a particular equipment supplier.

We work with various machine manufacturers to ensure you have access to the best coffee equipment to suit your needs.

We appreciate the importance of a correctly working coffee

machine and are aware that any downtime can be both frustrating, and have financial implications for your business.

We have various service options aimed at removing some of the uncertainties from owning your coffee equipment; from complete cover service and breakdown packages, through to simple 'Pay As You Go' options.

Whole beans for espresso, filter & cafetière

We work closely with coffee farms across the globe; from Cuba to Laos, Ethiopia to Brazil, selecting only the best coffee beans and slow-roast them, using traditional methods, to develop their full flavours and aromas.

Organic Espresso

Home Compostable One Cup Filters

We have now switched from plastic to our new home compostable One Cup Filter Coffees. Our coffee filters are made from bagasse, which is the natural sugarcane fibres left after extracting the sugar. These filters are naturally home compostable, and can be disposed of in standard waste, green and food waste, or in a well-managed compost heap.
