

Via Nova IV

High volume 4 group espresso pod system

The Via Nova IV is our high volume commercial espresso pod machine. It excels at producing large numbers of consistently great coffees. With four separate groups, a hot water outlet, one standard steam wand and an automatic steam wand, the Via Nova IV is ideal where large volumes of high quality coffees is a key requirement. Espresso pods remove the need for a grinder and the addition of the automatic steaming wand make the Via Nova easy to operate and reduce the need for staff training.

Ideal for: ▪ Hotels ▪ Cafés ▪ Bars ▪ Restaurants

Technical data

Product code	008134
Power	4200W - 20 Amp Single Phase
Dimensions (WXDXH)	78 mm x 53,5 mm x 63,5 mm
Weight	70 kg
Number of groups	4 [2 x 2] separate groups
