

# Via Nova II

## Compact commercial espresso pod system

The Via Nova II is a medium volume, compact commercial espresso pod machine. The Via Nova II comes with two separate groups, a hot water outlet, one standard steam wand and an automatic steam wand. It produces consistently great espresso at the touch of a button without the mess or waste associated with traditional espresso machines. Espresso pods remove the need for a grinder and the addition of the automatic steaming wand make the Via Nova easy to operate and reduce the need for staff training.

Ideal for: ▪ Hotels ▪ Cafés ▪ Bars ▪ Restaurants

### Technical data

Product code	008109
