DANGER: contains citric acid. CORROSIVE**SPECIAL DESCALER PRODUCT**

Descaler product for[®] espresso machine 

To use it, please read your machine's user manual carefully.

- Causes burns to the skin and serious lesions to the eyes. Avoid all contact with the skin and eyes.
- Keep out of children's reach.
- Wear protective gloves, eye protectors and protective clothing.
- Store in a closed container.
- **IN THE EVENT OF CONTACT WITH THE EYES:** Rinse carefully with water for several minutes. Remove the victim's contact lenses if they are wearing any and if they may be removed easily. Keep rinsing.
- **IN THE EVENT OF CONTACT WITH THE SKIN (or hair):** remove contaminated clothing immediately. Rinse the skin with water / shower.
- **IF SWALLOWED:** Rinse mouth. **DO NOT** make the person vomit.
- **Call a POISON CONTROL CENTRE or a doctor immediately. European number 112.**
- The machine's warranty is guaranteed only if the machine is descaled regularly (every 6 months).
- For your safety, make sure that you follow the instructions in this user manual.

LIMESCALE REMOVAL DETAILS

- **For NéOh Espresso and Xpress'OH, please proceed as stated below:**
 1. Fill the water tank with 0,5 liter of water.
 2. Add the full bottle of descaling liquid to the water.
 3. Turn the machine ON. Wait for the machine to be ready for brewing (heating phase completed – no LED flashing).
 4. Remove the Drip Tray and place a recipient under the coffee spout.
 5. Put the descaling rubber strip in position.

6. Lower the handle (no. 2)
7. Press the Large coffee (no. 5) button and let it run until it stops automatically.
8. Repeat these operations till water tank is empty.
9. Once the water tank is empty, turn the machine OFF, remove the water tank from the machine.
10. Rinse thoroughly the water tank.
11. Fill the Water Tank completely with water.
12. Replace the water tank on the machine, and turn it ON. Wait for the machine to be ready for brewing (heating completed – no LED flashing).
13. Repeat Step 7 until water runs clear.
